FRICTIOLAB

MICRO-TORQUE MEASUREMENT

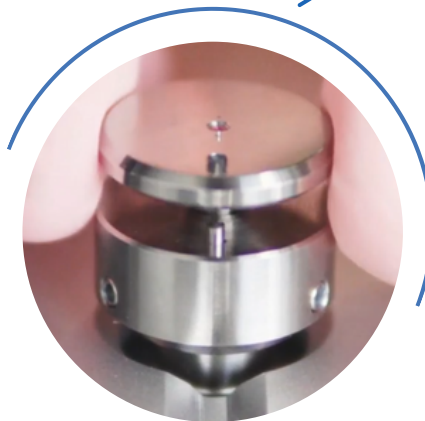

Modular appliance

Modular device for easy-to-use micro-torque measurement and control of micro-torques.

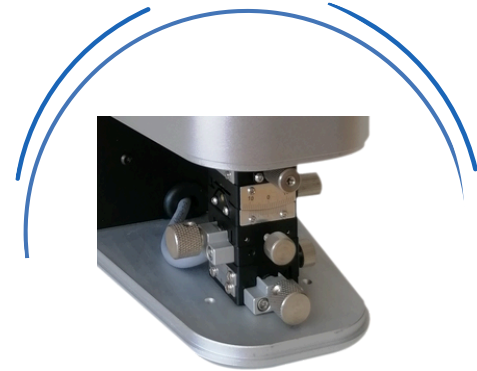

Intuitive software

A special software package enables you to carry out all the measurements and ageing tests dedicated to barrels.

Quick and efficient

Interchangeable fitting system for quick series changeover.

Perfectly coaxial installation

A combination of a precision X/Y slide and a double goniometer enables rapid adjustment of the coaxiality of the component mounting and the drive axis.
